

System Requirements Specification

Project:Text editors

Functional requirements

FR1: All systems of the text editors product line shall provide user with the ability to open the text files.

FR2: All systems of the text editors product line shall provide user with the ability to save the text files.

FR3: All systems of the text editors product line shall support the file formats.

FR4: In case support file formats is included all systems of the text editors product line shall provide user with the ability to choose between 1 and 2 file formats.

FR5: In case support file formats is included some systems of the text editors product line shall provide user with the ability to edit the txt files.

FR6: In case support file formats is included some systems of the text editors product line shall provide user with the ability to edit the rtf files.

FR7: All systems of the text editor product line shall provide user with the ability to select the text.

FR8: All systems of the text editors product line shall provide user with the ability to paste the text.

FR9: All systems of the text editors product line shall provide user with the ability to copy the text.

FR10: All systems of the text editors product line shall provide user with the ability to cut the text.

FR11: All systems of the text editor product line shall provide user with the ability to replace the text.

FR12: All systems of the text editor product line shall provide user with the ability to find the text.

FR13: Some systems of the text editors product line could provide user with the ability to add the images.

FR14: Some systems of the text editor product line could provide user with the ability to create the lists.

FR15: In case create lists is included all systems of the text editor product line shall provide user with the ability to create the numeric lists.

FR16: In case create numeric lists is included all systems of the text editors product line shall provide user with the ability to choose between 1 and 2 types (roman, arabic).

FR17: In case create lists is included all systems of the text editors product line shall provide user with the ability to choose between 1 and 3 list types.

FR18: In case create lists is included all systems of the text editor product line shall provide user with the ability to create the alphabetic lists.

FR19: In case create alphabetic lists is included all systems of the text editors product line shall provide user with the ability to choose between 1 and 2 types (upper case, lower case).

FR20: In case create lists is included all systems of the text editor product line shall provide user with the ability to create the vignette lists.

FR21: In case create vignette lists is included all systems of the text editors product line shall provide user with the ability to choose between 1 and 4 types (dot, diamond, arrow, star).

FR22: Some systems of the text editors product line could provide user with the ability to align the text.

FR23: In case align text is included all systems of the text editors product line shall provide user with the ability to choose between 1 and 4 types (left, right, center, justify).

FR24: Some systems of the text editors product line could provide user with the ability to change the Font.

FR25: In case change font is included some systems of the text editors product line could provide user with the ability to change the font color.

FR26: In case change font is included all systems of the text editors product line could provide user with the ability to change the font size.

FR27: In case change font is included some systems of the text editors product line could provide user with the ability to change the font family.

FR28: In case change font family is included all systems of the text editors product line shall provide user with the ability to choose between 1 and 2 types (arial, calibri, times new roman,tahoma).

FR29: In case change font is included some systems of the text editors product line could provide user with the ability to change the font style.

FR30: In case change font style is included all systems of the text editors product line shall provide user with the ability to choose between 1 and 7 types (regular, bold, italic, underline, strikethrough, superscript, subscript).

FR31: Some systems of the text editor product line could provide user with the ability to zoom the text.
